

TECHNICAL DATA SHEET

GENA17539

PRODUCT NAME	LLDPE Powder
RESIN SUITABILITY	LDPE, LLDPE, MDPE,HDPE,PP
LIGHT FASTNESS	8.00
MIGRATION	5.00
HEAT STABILITY (MAX. °C)	300.00

Applications :

GENA17539 is a linear low density polyethylene which is designed for injection molding application. This grade has very narrow molecular weight distribution, offers an excellent impact strength, rigidity, environmental stress cracking resistance and processability

Method of Addition :

-

Addition Rate :

Use 100% as it is.

Packaging :

GENA17539 is supplied in regular powder form packed in 20 kg. that should be stored in a dry place at room temperature.

Storage :

Recommended storage life up to 12 months provided it is stored as directed.

Regulatory Status :

Raw materials used in this product comply with:

CONEG 94/62/EC

FDA 21 CFR part 177.1520 for plastic olefin polymers

Food Contact Resolution AP (89)1

RoHS Directive 2015/863

Toy Standard EN71 Part 3
